

Commercial Pasta Dryer EC50

Touchscreen control panel

Optional long pasta drying rack

The EC50 commercial pasta dryer accommodates 50 drying trays (2 carts) and holds up to 300-330 lbs of fresh pasta per cycle. Built-in fans and heaters work along temperature and humidity sensors to create a flow of hot air through the pasta, slowly drying the pasta from the inside out. A touchscreen control panel allows you to select from programmable recipes controlling ventilation, temperature, humidity, air intake and exhaust. Drying cycles are approximately 18 hours and vary by pasta length and density. Wood frame drying trays are included. The EC50 now features full stainless steel panels.

FEATURES

- › Commercial Pasta Dryer
- › 300-330 lbs per Cycle Capacity
- › Stainless Steel Construction
- › Touchscreen Control Panel
- › Programmable Recipes for Different Pasta Types
- › Dry Pasta with Similar Thickness and Length
